DETAILED ACTION

Page 2

Reissue Applications

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

The statement specifying at least one error being relied on is as follows...

"In an Office Action dated 06 November 2008, the Examiner asserted that subject claim 1, the sole claim in the parent patent, is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Every error in the patent application which was corrected in the present reissue application, and which is not covered by prior declarations submitted in this application, arose without any deceptive intention on the part of the applicant."

This statement is incorrect because the specified error comes from an Examiner's action, not the inventor. It is suggested that the error statement be worded such that it comes from the inventor.

For example, "claim 1 is incorrect because it is directed to non-statutory subject matter under 35 U.S.C. 101".

The oath declaration does not list each and every amendment by date that has been made during the prosecution history of the present application. As a result, there is no basis for the statement...

"I have reviewed and understand the contents of the above4denUfled specification, including the claims, as amended by any amendment referred to above."

Claims 2 and 3 are rejected as being based upon a defective reissue oath/declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

Application/Control Number: 09/865,469 Page 3

Art Unit: 3663

The nature of the defect(s) in the oath/declaration is set forth in the discussion

above in this Office action.

Specification

Page 2 of the specification recites the following...

"This application is a continuation of U.S. Patent Application Serial No. 09/312,036 filed May 14, 1999 which is a continuation of U.S. Patent Application Serial No. 08/682,904 filed July 16, 1996, now U.S. Patent 5,959,574 which is a..."

The present application is a reissue of U.S. Patent 5,959,574 and, as such, is not a continuation of U.S. Patent Application Serial No. 09/312,036. Appropriate correction

is required.

Any inquiry concerning this communication should be directed to Mark Hellner at

telephone number 571 272 6981.

/Mark Hellner/
